

At Growing Greener Summer Camp, youth dig in and discover the richness and diversity of an organic farm and its surrounding woods, fields and streams. Our camp is a daily experience of the "farm to table" connection as campers see, feel and taste where their food comes from. Campers learn to grow their own food and then prepare farm-fresh harvests for their daily snacks. Nature hikes, science-based projects, natural crafts, stories and games are also an important part of each fun-filled day.

“My daughter wants to plant tomatoes in our backyard. She was truly inspired by the activities at camp. She does yoga in the mornings and will now eat pesto. Thank you Greener Partners for making it special for Katie!”  
camp mom
